

João Assis

Gura Group

Bilateral Meetings

- Tuesday 16:00 - 18:00

Description

Gura Group operates in the global market to provide a better technical, engineering and commercial support to our partners. The main services that we can provide are: - Consulting - Project Management (follow up of tools and SOP of projects that our partners are delivering in toolmakers around the world) - Engineering - Product development - Quick prototyping - Cost reduction during the production - Tooling - And other services related to the industry We have a long expertise on automotive, medical, multicomponent, packaging and multicavity tools. Our focus is Advanced Customer Care and we work along with our customers to provide the best solutions for their needs. Gura developed several partnerships with tool makers in Portugal that are able to supply the tools that we need.
